Julien DEVESTER

JUNIOR DEVOPS ENGINEER

Junior DevOps Engineer with hands-on experience in CI/CD (Jenkins, GitLab, GitHub), containerisation (Docker, Kubernetes) and infrastructure automation (Ansible, Terraform). Currently completing a security-oriented DevOps programme at Technifutur while actively self-studying through KodeKloud's DevOps Bootcamp. Available immediately. Targeting roles with a strong automation and cloud stack.

LANGUAGES

French Native language

English B2, Technical (read, written, spoken)

KEY STRENGTHS

Self-directed learner Proactively completing KodeKloud DevOps Bootcamp alongside formal training to fill stack gaps.

Project ownership Built and deployed a full DevOps stack independently, from provisioning to monitoring.

Creative background 4 years in graphic design and game dev bring a structured, visual approach to documentation and dashboards.

Pressure & autonomy Managed client deadlines and collaborative projects as a freelancer from age 16.

CERTIFICATIONS & SELF-LEARNING

KodeKloud DevOps Bootcamp *In progress (2026)*

Docker Certification Technifutur *(expected July 2026)*

Introduction to DevOps Codecademy *(Aug. 2025)*

Learn Python3 Codecademy *(Aug. 2023)*

CKA (Certified Kubernetes Administrator) Planned Q4 2026

INTERESTS

Motorcycles Class A license (Planned), passionate about bikes

Guitar Amateur practice

Competitive Gaming Strategy, pressure management

EDUCATION

Security-Oriented DevOps

From October 2025 to July 2026 Technifutur Liège

- Comprehensive DevOps stack with a security focus, detailed in technical skills section.

Self-directed Learning (3D Modeling & Programming)

From September 2020 to July 2023 Codecademy, Udemy Remote

- Self-taught Python 3 and JavaScript over 3 years through online platforms.

IT Transition Technique (Secondary Education)

From September 2015 to June 2018 E.C.C.S.A. Liège

- Foundational knowledge in computer systems, networking, and IT troubleshooting.

Additional training

From 2019 to 2024 IFAPME / IPEFA Liège

- Moped Mechanics (IFAPME, 2019) and Accounting Technician (IPEFA, 2024)

EXPERIENCE & PROJECTS

DevOps Fullstack Lab

Since 2026 (Personal Project) Remote

- Designed and deployed a full DevOps stack on DigitalOcean (Ubuntu 24.04, Frankfurt).
- CI/CD pipeline via GitHub Actions: automated build, Docker image push to Docker Hub and deploy to Kubernetes on each push to main.
- Kubernetes k3s cluster with 2 replicas, rolling updates and self-healing.
- Full IaC: Terraform to provision the DigitalOcean Droplet, Ansible for server configuration.
- Monitoring stack: Prometheus + Grafana (Node Exporter Full dashboard) deployed in-cluster.
- Tools: Docker, Kubernetes (k3s), GitHub Actions, Terraform, Ansible, Prometheus, Grafana, Nginx, DigitalOcean.
  - Project available here : https://github.com/Julien-Dvstr/Devops-FullStack-Lab

Infrastructure Automation - Ansible

From 2025 to 2026 Technifutur Liège

Wrote Ansible playbooks to automate VM provisioning and server configuration (Apache, system administration). Managed multi-service environments through infrastructure-as-code practices.

System Administration & Virtualisation Lab

From 2025 to 2026 Technifutur Liège

Deployed and administered servers (Apache, SQL, Windows Server) across KVM, VirtualBox and Hyper-V environments.

Video Game Developer

From 2017 to 2019 Collaborative Freelance Project Remote

Team-based project with Git version control, task coordination and asset pipeline management. Tools: Unity, Blender, Photoshop.

TECHNICAL SKILLS

CI/CD Jenkins, GitLab CI/CD – Continuous integration & deployment

Containers Docker, Docker Swarm, Kubernetes

IaC Ansible, Terraform, YAML

Cloud & Virt. Azure, Private Cloud, Hyper-V, KVM, DigitalOcean.

OS & Systems Linux (Mint, Debian/Ubuntu), Windows Server/10, macOS – system administration

Network & Security TCP/IP, DNS, DHCP, routing, DMZ, firewall, VPN – infrastructure security basics

Web Servers Apache (Linux), IIS (Windows), REST API

Databases Microsoft SQL Server, MariaDB, SQL

Monitoring Prometheus and Grafana (CI/CD supervision)

Versioning Git, GitHub, GitLab

Scripting Bash/Shell (automation, Linux admin), Python
